Spanish Exploration and Conquest

Spanish dominance in the Americas was based on more than a papal ruling and a treaty. Spain owed its expanding power to its explorers and conquerors (called *conquistadores*). Feats such as the journey across the Isthmus of Panama to the Pacific Ocean by Vasco Núñez de Balboa, the circumnavigation of the world by one of Ferdinand Magellan's ships (Magellan died before completing the trip), the conquests of the Aztecs in Mexico by Hernan Cortés, and the conquest of the Incas in Peru by Francisco Pizarro secured Spain's initial supremacy in the Americas.

The conquistadores sent ships loaded with gold and silver back to Spain from Mexico and Peru. They increased the gold supply by more than 500 percent, making Spain the richest and most powerful nation in Europe. Spain's success encouraged other nations to turn to the Americas in search of gold and power. After seizing the wealth of the Indian empires, the Spanish instituted an *encomienda* system, with the king of Spain giving grants of land and natives to individual Spaniards. These Indians had to farm or work in the mines. The fruits of their labors went to their Spanish masters, who in turn had to "care" for them. As Europeans' diseases and brutality reduced the native population, the Spanish brought enslaved people from West Africa under the *asiento* system. This required the Spanish to pay a tax to their king on each slave they imported to the Americas.

English Claims

England's earliest claims to territory in the Americas rested on the voyages of John Cabot, an Italian sea captain who sailed under contract to England's King Henry VII. Cabot explored the coast of Newfoundland in 1497.

England, however, did not follow up Cabot's discoveries with other expeditions of exploration and settlement. Other issues preoccupied England's monarchy in the 1500s, including Henry VIII's break with the Roman Catholic Church. In the 1570s and 1580s, under Queen Elizabeth I, England challenged Spanish shipping in both the Atlantic and Pacific Oceans. Sir Francis Drake, for example, attacked Spanish ships, seized the gold and silver that they carried, and even attacked Spanish settlements on the coast of Peru. Another English adventurer, Sir Walter Raleigh, attempted to establish a settlement at Roanoke Island off the North Carolina coast in 1587, but the venture failed.

European Treatment of Native Americans

Most Europeans looked down upon Native Americans. The Europeans who colonized North and South America generally viewed Native Americans as inferior people who could be exploited for economic gain, converted to Christianity, and used as military allies. However, Europeans used various approaches for controlling Native Americans and operating their colonies.

Spanish Policy

The Spanish who settled in Mexico and Peru encountered the highly organized Aztec and Inca empires. Even after diseases killed most natives, millions remained in these empires that the Spanish could incorporate as laborers in their own empire. Many natives who did not die from disease died from forced labor. Because few families came from Spain to settle the empire, the explorers and soldiers intermarried with natives as well as with Africans. The latter were captured in Africa and forced to travel across the ocean to provide slave labor for the Spanish colonists. A rigid class system developed in the Spanish colonies, one dominated by pure-blooded Spaniards.

English Policy

Unlike the Spanish, the English settled in areas without large native empires that could be controlled as a workforce. In addition, many English colonists came in families rather than as single young men, so marriage with natives was less common. Initially, at least in Massachusetts, the English and the American Indians coexisted, traded, and shared ideas. American Indians taught the settlers how to grow new crops such as corn (maize) and showed them how to hunt in the forests. They traded various furs for an array of English manufactured goods, including iron tools and weapons. But peaceful relations soon gave way to conflict and open warfare. The English had no respect for American Indian cultures, which they viewed as primitive or "savage." For their part, American Indians saw their way of life threatened as the English began to take more land to support their ever-increasing population. The English occupied the land and forced the small, scattered tribes they encountered to move away from the coast to inland territories. They expelled the natives rather than subjugating them.

Native American Reaction

North American tribes saw themselves as groups distinct from each other, not as part of a larger body of Native Americans. As a result, European settlers rarely had to be concerned with a unified response from the Native Americans. Initially the European goods such as copper pots and guns had motivated the natives to interact with the strangers. After the decimation of their peoples from the violence and disease of the Europeans, the Native Americans had to adopt new ways to survive. Upon observing the Europeans fighting each other, some tribes allied themselves with one European power or another in hopes of gaining support in order to survive. A number of tribes simply migrated to new land to get away from the slowly encroaching settlers. Regardless of how they dealt with the European invasion, Native Americans would never be able to return to the life they had known prior to 1492.

Starting with Jamestown (Virginia) in 1607 and ending with Georgia in 1733, a total of 13 distinct English colonies developed along the Atlantic Coast of North America. Every colony received its identity and its authority to operate by means of a charter (a document granting special privileges) from the English monarch. Each charter described in general terms the relationship that was supposed to exist between the colony and the crown. Over time, three types of charters—and three types of colonies—developed:

- Corporate colonies, such as Jamestown, were operated by joint-stock companies, at least during these colonies' early years.
- Royal colonies, such as Virginia after 1624, were to be under the direct authority and rule of the king's government.
- Proprietary colonies, such as Maryland and Pennsylvania, were under the authority of individuals granted charters of ownership by the king.

Unlike the French and Spanish colonists, the English brought a tradition of representative government. They were accustomed to holding elections for representatives who would speak for property owners and decide important measures, such as taxes, proposed by the king's government. While political and religious conflicts dominated England, feelings for independence grew in the colonies. Eventually, tensions emerged between the king and his colonial subjects. This chapter summarizes the development of the English colonies.

Early English Settlements

In the early 1600s, England was finally in a position to colonize the lands explored more than a century earlier by John Cabot. By defeating a large Spanish fleet—the Spanish Armada—in 1588, England had gained a reputation as a major naval power. Also in this period, England's population was growing rapidly while its economy was depressed. The number of poor and landless people increased, people who were attracted to opportunities in the Americas. The English devised a practical method for financing the costly and risky enterprise of founding colonies. A joint-stock company pooled the savings of many investors, thereby spreading the risk. Thus, colonies on the North Atlantic Coast were able to attract large numbers of English settlers.

Jamestown

England's King James I chartered the Virginia Company, a joint-stock company that founded the first permanent English colony in America at Jamestown in 1607.

Early Problems The first settlers of Jamestown suffered greatly, mostly from their own mistakes. The settlement's location in a swampy area along the James River resulted in fatal outbreaks of dysentery and malaria. Moreover, many of the settlers were gentlemen unaccustomed to physical work. Others were gold-seeking adventurers who refused to hunt or farm. One key source of goods was from trade with American Indians—but when conflicts erupted between settlers and the natives, trade would stop and settlers went hungry. Starvation was a persistent issue in Jamestown.

Through the forceful leadership of Captain John Smith, Jamestown survived its first five years, but barely. Then, through the efforts of John Rolfe and his Indian wife, Pocahontas, the colony developed a new variety of tobacco that would become popular in Europe and become a profitable crop.

Transition to a Royal Colony Despite tobacco, by 1624 the Virginia colony remained near collapse. More than 6,000 people had settled there, but only 2,000 remained alive. Further, the Virginia Company made unwise decisions that placed it heavily in debt. King James I had seen enough. He revoked the charter of the bankrupt company and took direct control of the colony. Now known as Virginia, the colony became England's first royal colony.

self-rule.

Representative Assembly in Virginia The Virginia Company encouraged settlement in Jamestown by guaranteeing colonists the same rights as residents of England, including representation in the lawmaking process. In 1619, just 12 years after the founding of Jamestown, Virginia's colonists organized the first representative assembly in America, the House of Burgesses.

Labor Shortages

In both Maryland and Virginia, landowners saw great opportunities. They could get land, either by taking it from or trading for it with American Indians, and Europeans had a growing demand for tobacco. However, they could not find enough laborers. For example, in Virginia, the high death rate from disease, food shortages, and battles with American Indians meant that the population grew slowly. Landowners tried several ways to find the workers they wanted.

Indentured Servants At first, the Virginia Company hoped to meet the need for labor using indentured servants. Under contract with a master or landowner who paid for their passage, young people from the British Isles agreed to work for a specified period—usually between four to seven years—in return for room and board. In effect, indentured servants were under the absolute rule of their masters until the end of their work period. At the expiration of that period, they gained their freedom and either worked for wages or obtained land of their own to farm. For landowners, the system provided laborers, but only temporarily.

Headright System Virginia attempted to attract immigrants through offers of land. The colony offered 50 acres of land to (1) each immigrant who paid for his own passage and (2) any plantation owner who paid for an immigrant's passage.

Slavery In 1619, a Dutch ship brought an unusual group of indentured servants to Virginia: they were black Africans. Because English law at that time did not recognize hereditary slavery, the first Africans in Virginia were not in bondage for life, and any children born to them were free. Moreover, the early colonists were struggling to survive and too poor to purchase the Africans who were being imported as slaves for sugar plantations in the West Indies. By 1650, there were only about 400 African laborers in Virginia. However, by the end of the 1660s, the Virginia House of Burgesses had enacted laws that discriminated between blacks and whites. Africans and their offspring were to be kept in permanent bondage. They were slaves.

Conflict in Virginia

Sir William Berkeley, the royal governor of Virginia (1641–1652; 1660–1677), used dictatorial powers to govern on behalf of the large planters. He antagonized small farmers on Virginia's western frontier because he failed to protect them from Indian attacks.

Bacon's Rebellion Nathaniel Bacon, an impoverished gentleman farmer, seized upon the grievances of the western farmers to lead a rebellion against Berkeley's government. Bacon and others resented the economic and political control exercised by a few large planters in the Chesapeake area. He raised an army of volunteers and, in 1676, conducted a series of raids and massacres against American Indian villages on the Virginia frontier. Berkeley's government in Jamestown accused Bacon of rebelling against royal authority. Bacon's army succeeded in defeating the governor's forces and even burned the Jamestown settlement. Soon afterward, Bacon died of dysentery and the rebel army collapsed. Governor Berkeley brutally suppressed the remnants of the insurrection, executing 23 rebels.

Lasting Problems Although it was short-lived, Bacon's Rebellion, or the Chesapeake Revolution, highlighted two long-lasting disputes in colonial Virginia: (1) sharp class differences between wealthy planters and landless or poor farmers, and (2) colonial resistance to royal control. These problems would continue into the next century, even after the general conditions of life in the Chesapeake colonies became more stable and prosperous.
